## Welcome to the StarWheel PICTO-KOANS

This is a collection of Hiero-Glyphs or Picto-Graphs matching the 108 StarWheel Mandalas.

## Each StarWheel Mandala image

is described by a SW Sutra and a Matrix of 9 Picto-Koans
There are $9 \times 108$ SW Picto-Koans $=972$

## A StarWheel Picto-Koan COLORING Book

will offer the 108 PK Matrices for artists of all ages to enjoy coloring in, either by hand or by computer after scanning.

# what प्वाॅe the plcto-koanझ? 

> Koan (from Japanese ko-an - a public proposition):
> "A paradox to be meditated upon that is used to train Zen Buddhist monks in order to abandon dependence on reason and to gain sudden enlightenment"
(Webster)
In a similar manner, but using pictograph designs instead of words, the StarWheel Picto-Koan designs are intended to speak to the intuitive, imaginative, mystical parts of us and to re-activate our ability for higher-dimensional communication. Each 2-D Picto-Koan is a doorway for the 3-D and higher-D geometry architectures and sensory constructs that are the live, sym-bolic language of telepathic perception...

Each Picto-Koan is composed of a modular grid of 9 Hieroglyphic units. Usually, the center hieroglyph is a mini-key representing the entire mandala. The other SW Hieros may hint at graphic elements of the mandala image, or they may illustrate the SW Sutra description or the SW Keyword. Some spirit teachings built in the StarWheel may also be extended \& complemented by the Picto-Koans.

> These Pícto-Koans are faery spúrit stories For playful meditation \& blissful contemplation The Picto-Koans are friendly \& open-hearted They will dance with yow from any direction.

The StarWheel hiero-graphic language is designed to act as a bridge between the direct experience of the mandala image - flooding the sensory system beyond the categories of the mind - and the alphabetic, linear, more accessible message of the Sutra description - speaking to the mind in a recognizable human language. The SW Hieros are an interface code - a frequency matrix translation - allowing an easier transition between the rational mind "making sense of the mandala" and the Infinite Spirit Self who IS the Mandala Maker.

Enter this Book of Picto-Koans as an exploration and a discovery journey, as you would go on a leisurely promenade in a magical garden... There is no goal to reach, no competition, no schedule... just gently following the promptings of your intuition and your curiosity...

The Picto-Koans are offered in 2D, yet they have a larger presence in 3D - if you want to allow for your psychic interactive mode. Browse through the book and casually stop at the hieros attracting you: these "familiar hieros" beckoning to you are like large size 3D temple architectures that invite to bow, circum-ambulate and, when ready, step in for an inner experience...

You are invited to make this Picto-Koan journey a personal, intimate experience... a date with your Self... Listen within for subtle signals of higher emotions or sensations and feel how your intuitive spirit-soul emotions may be tickled, activated into a joyful recognition of freely dancing back home...

## दोठout इacred tang్రuag్de

Spirited traditional cultures all have a sacred language. Not to engage the rational mind, but rather to engage the vibrational fields and energy bodies. Sacred languages are vibratory technologies of consciousness providing their users with spiritual keys to directly find their right \& meaningful place in the overall scheme of the cosmos. They are an integrative knowledge whereby each fragment contains the harmonics and the heart of the Whole.

A hieroglyph, traditionally, is a doorway into an essential energy process of the conscious universe. Each sign is a resonant fractal of the whole as number, color or form in space, musical note or chord in time, fragrance or dance in space-time. Each unit of the sacred language is a window into, a magical communion with the realms of Mother Nature \& Father Sky and all other intelligences the soul is attuned to. Speaking a letter-glyph is experiencing its echoing power throughout creation and dancing its life-story to a full audience. Uttering families of glyph-sounds ("words") is entering the web of infinite dances activated by the ritual yantras, mantras \& ceremonies that nurture and guide individual / community life and dreamtime.
The sacred language is vibrationally related to music modes, architecture \& social structures, customs, "art", "science", etc... Within the context of a sacred language, no activity is just "worldly", disconnected from the Sacred Hoop of Life, but becomes part of a spiritually creative \& imaginative energy-scape: higher / inner "reality".

In these contemporary post-Babel times, most earth languages do not converse any more with the pervading Presence of the Universe. Yet, I believe that the collective cycle is bouncing back from its extremes of ego-individuation \& spirit separation: we are now globally called to climb again the ladder of Integration \& Oneness. A key to this global hi-D jump is to learn from ancient cultures and to understand the gift of their "language" wisdom:

## ... how to let Oneness play throughout all aspects of Life.

As the collective consciousness moves into new frequency ranges, it is timely, I believe, to corecreate a global sacred language: a cosmogonic language of light \& pictographic communication - the tele-thought holograms of pulsating lights, sounds, geometries and body dances that sustain creation codes \& spirit telepathy. We are called to gather the remnants of sacredness still alive and, starting from the core-source of Spirit Oneness, to progressively re-birth a sacred Language Mandala in order to sustain the new vibrational grid templates of our emerging global civilization of Love and respect for Life.

The new global sacred language can \& will evolve, in an organic way, alongside all other existing types of languages \& communications. But grow it will... to weave a common ground of Oneness where humankind can again play at being Infinite...

## Happy Dance, Aya Sheevaya

The following 9 pages are the B\&W line drawings of all 972 Picto-Koans, for all 9 SW series.
There are 9 x 12 = 108 PKs in each series of 12 SW Mandalas.
We will then visit with each matrix of 9 PKs and let you find your favorites to enjoy and color in...
